AGRONOMY?

AGRONOMY 4 ME CATCHER

Create

- 1. Cut at the dashed line below instructions
- 2. Fold diagonally with print facing out. Unfold and do the same for the other two corners.
- 3. With print facing down, fold each corner to the center to create a smaller square.
- 4. Flip over, so the facts are facing up. Fold each corner to the center again to create a smaller square.
- 5. Fold the square in half. Then slide fingers under the four flaps and push together to create the 3-D catcher.

Explore

- 1. With the catcher closed, one player choses an outside word.
- 2. The second player spells out the word, opening and closing the catcher in alternating directions for each letter.
- 3. The first player chooses an inside term, and lifts the flap to learn a fun fact!
- 4. Alternate players and repeat.
